

Annual Giving

This year St. Luke's Episcopal School is celebrating our 50th Anniversary.

We seamlessly blend strong traditional components of our past with progressive new methods and opportunities.

Together our strengths are many...

WHAT is strong?

Our TEACHERS are strong.

The Annual Giving Campaign helps provide many professional development opportunities and allow for smaller classrooms and more individualized attention.

SCIENCE is strong.

With one of the only elementary math and science labs in the city and our collegiate upper school labs, St. Luke's is ahead of the curve in science facilities.

We also have the areas only college preparatory Biomedical Science Program. Helping students who may wish to pursue a career in the health and science fields get a head start.

St. Luke's offers two middle school science trips. A 6th grade trip to Tremont Tennessee that enhances the Earth Sciences curriculum.

A 7th grade trip that allows students an opportunity to further explore their Life Sciences class in a unique setting at the Marine Lab in Key Largo.

This trip also emphasizes our dedication to cross-curricular education as students study Old Man and the Sea in preparation to visit the Ernest Hemingway home while in the Florida Keys.

ATHLETICS are strong.

Our dedicated and caring coaching staff is making remarkable progress with Varsity teams that have no seniors yet! We are competitive on the fields and on the courts. Some of our teams progressed to the state level of competition in their first year of competition.

We have the largest competitive sports program in the area. Beginning with our youngest preschoolers and up to our high school, St. Luke's WILDCATS are making a name throughout the city.

More than 85% of our students are involved in competitive sports from archery to volleyball.

We are members of the Alabama High School Athletic Association (AHSAA) and have recently formed the Mobile Alabama Independent Youth League.

FINE ARTS are strong.

St. Luke's is blessed to have two well-equipped art classrooms both with their own kiln for firing pottery. With a fully furnished frame shop on the University campus, we now have what it takes to mat and frame our students artwork.

PERFORMING ARTS are strong.

We offer chorus, strings, drama, concert and marching band. This year St. Luke's marching band took the field for their first halftime performance.

We are currently renovating the 800 seat theater with a grant from the Monte L. Moorer Foundation.

TECHNOLOGY is strong.

St. Luke's has a full functioning Mac Lab on both the Japonica and the university campuses. This provides opportunities for students to utilize state of the art software applications to create projects and do research in conjunction with their core academic courses.

We are working to provide additional smart technology in classrooms throughout the school.

COMMUNITY SERVICE is strong.

St. Luke's strives to instill the importance of "giving back" at every opportunity. Clubs such as the middle school service club, Key Club and taking our chorus to senior centers are just a few examples of how our students are involved in the Mobile community.

STUDENT LIFE is strong.

The St. Luke's "experience" is not all about work and study. There is evidence abound of the FUN our students have at school on a daily basis.

WHO is strong?

WE are STRONG TOGETHER!

And will continue to be strong if everyone supports the 2011-2012 Annual Giving Campaign.
